LOCAL ENTREPRENEURS GRADUATE

Graduation day at the REISA Business Hub was filled with much excitement. Together with Raizcorp, we honoured the success of local entrepreneurs who have worked tirelessly to build and grow their businesses through our enterprise development programme.

The event recognised 11 SMMEs who completed their training through our Enterprise Development programmes, the Business Commercialisation Programme (BCP) and the three-year Entrepreneur Development Programme.

"The REISA programme supported my business by funding my entrepreneurial development with Raizcorp. It gave me the knowledge and support to grow my business to the level I had always hoped for." - Antoinette Bontle Lehula, one of the graduates.

UBUNTU WELLNESS PROJECT PROMOTES SAFER SCHOOLS

We were proud to host the Ubuntu Wellness Project, in partnership with Boipelo Resources, across all nine Gamagara schools. Facilitated by PrisonDENT, the initiative aimed to promote safer schools and prevent crime by empowering learners with the knowledge and values needed to make positive life choices.

The sessions covered vital topics such as the consequences of criminal behaviour, the importance of education, self-confidence, self-awareness, and resisting peer pressure.
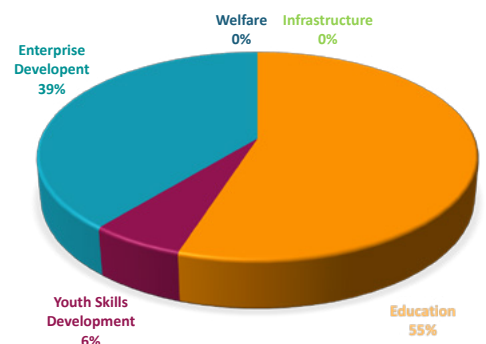

WELCOMING OUR NEW INTERNS

We are delighted to welcome two new interns to the REISA team, as part of our ongoing commitment to youth development and local skills empowerment. Rhyno Ditamale has joined as a Technical Service Intern, and Omphile Matebesi has joined as a Social Performance Intern.

Both began their journey on 1 July 2025, where they are gaining hands-on experience and structured mentorship within their respective departments. Their roles provide exposure to the day-to-day operations of the solar plant and local office, equipping them with practical skills and industry insight.

We look forward to supporting Rhyno and Omphile as they contribute fresh ideas and energy to our team.
